

LAPIS CONFERENCE

Saturday 14th June 2008

YMCA, St Albans Road,

St Annes, Lancashire, FY8 1XD

Mike Hallowell

Mike is a full-time writer and paranormal researcher. He takes care of scary business by investigating ghosts, poltergeists, UFO sightings and anything that scares the bejabbers out of most people. He says that earning a living by visiting haunted pubs and castles is as good as it gets! **He will talk about the incredible South Shields Poltergeist case. This is the true story of one of the world's most terrifying cases of poltergeist infestation where one invisible entity went on a mission to cause terror.** In December 2005, a South Tyneside family were attacked by a violent poltergeist. Now, for the first time, one of the researchers who confronted it will tell the full shocking story. This may well be the most terrifying account of a supernatural encounter that you will ever hear and definitely one that you will never forget.

Malcolm Robinson

Malcolm is a premier league UFO & paranormal researcher and founder of Strange Phenomena Investigations (SPI). He will present a lecture on his life's research looking into the weird and the wonderful and will provide many anecdotes of hilarious stories and situations that he has found himself in. **He will share with the audience tales of first hand UFO & ghostly encounters, including a number of his own incredible tales. He will also discuss some of his research at Loch Ness looking for 'Nessie' and his research into UFO sightings in Scotland.** All in all this will be a talk for everyone and aims to inform, educate, and amuse. See www.lapisufo.com for a video of the famous Scottish UFO case - "The Livingston Incident" which Malcolm investigated. And yes, he is the proud keeper of Bob Taylor's infamous trousers and may even whip them out at the conference!

Paul Vella

Paul is an independent Forensic Computer Expert Witness by trade, specialising in criminal defence cases, but he also runs the world's best Bigfoot web site - www.bigfootresearch.com. **He has made several trips to the relevant areas of the United States over the years gathering evidence and is widely regarded as the most credible authority on the subject to be found this side of the Atlantic.** A natural sceptic, Paul errs on the side of caution when it comes to Bigfoot evidence and reports, but as someone who works with forensic evidence on a daily basis, he says that some of the evidence for the existence of Bigfoot is compelling but will reserve judgement until he has seen one for himself. See www.lapisufo.com for a video which provides a precis of the famous "Patterson-Gimlin Footage" which Paul will forensically examine during his lecture.

Matthew Williams

Matthew is a controversial figure in the world of ufology. He is the only man in Britain to have been convicted of making crop circles when he was fined in 2000 after admitting damaging a farmer's crops in Wiltshire. Since then, he has created many amazing and complex circles, some in front of TV cameras. So why have we asked a circle maker to speak at a LAPIS conference? **The reason is that incredibly, whilst in the fields creating the circles, he has encountered strange paranormal phenomena in and around these formations on many occasions.** For a controversial interview see www.lapisufo.com. He discusses the 07/07/07 East Field circle which many believe was made by paranormal forces but Matthew states otherwise. However, far more important are the revelations of beings in and around the circles. He will discuss these in detail during his lecture.

Price of the tickets is £12 in advance or £15 on the day of the conference.

Timings: - Doors open 10am. The opening address will be at 10.30am and lectures will conclude around 5.30pm. LAPIS cannot be held responsible for changes to the programme. Visit www.lapisufo.com for regular updates. For further information please contact 'Janet' on 01253 890601 or email lapisufo@gmail.com

Please send me _____ tickets. I enclose a cheque/postal order made payable to LAPIS for £ _____
